# **COMMON ENTRANCE EXAMINATION AT 11+**

## **MATHEMATICS**

Monday 14 January 2008

Please read this information before the examination starts.

- This examination is 60 minutes long.
- Please try all the questions.
- · Write your answers on the dotted lines.
- All working should be written on the paper.
- Tracing paper may be used.
- Calculators are not allowed.

She has 144 British stamps and 68 foreign stamps.  (i) How many stamps does she have in total?	
	١٩٢٢
Answer:	(2)
(ii) How many more British stamps than foreign stamps does she have?	
Answer:	(2)
(iii) Pat arranges her 144 British stamps in an album. Each page holds 6 stamps. How many pages does she use?	
Answer:	(2)
(iv) Her brother, Lee, has 3 times as many foreign stamps as she does. How many foreign stamps does he have?	
Answer:	(2)

	Answer:	(1)
(b)	Write down the number which is 10 less than 1108	
	Answer:	(1)
(c)	Write down the number which is 100 times bigger than 40	
	Answer:	(1)
(d)	Write down the number which is 10 times smaller than 83	
	Answer:	(1)
(e)		
	The temperature in the freezer is 10 °C colder.  What is the temperature in the freezer?	
	Answer:°C	(2)

2. (a) Write down the number which is 10 more than 291

	2	3	5	8	13	21	34	55	89	
From the number (i) a multiple o		ove, v	write do	own						
(ii) a prime nun	nber b	oigger	than 6	k	Answe	ər:			•••••	(1
					Answe	ər:				(1)
(iii) two numbers	s with	a diff	erence	of 1	18					
(iv) two numbers	s who	se pro	oduct is	s 26	Answe	r:		and		(1)
(v) the median o	of the	nine r	าumber		Answe	r:		and		(1)
0040000				,	Answer		••••••	•••••••		. (2)

Here is the start of a number pattern:

3.

4.	Notby School won the final of the hockey tournament.		
	(i) A hockey pitch is 91.4 metres long.  Write this length in centimetres.		
	Answer: cm	(1)	
	(ii) There were 2096 spectators at their final match.  Write this number correct to the nearest hundred.		
	Answer:	(1)	
	(iii) The hockey trophy weighed half a kilogram.  How many grams is this?		
	Answer: g	(1)	
	Mr Gowl, the hockey coach, carried out a survey to see whether the children who scored goals were right-handed or left-handed.		
	Here are his results in a Venn diagram:		
	scored a goal right-handed		
	(iv) Use the Venn diagram to write down		
	(a) the number of right-handed children in the team		
	Answer:	(1)	
	(b) the number of left-handed children who scored a goal		

(1)

S.A. 28182**03** 

Answer: ..... cm<sup>2</sup>

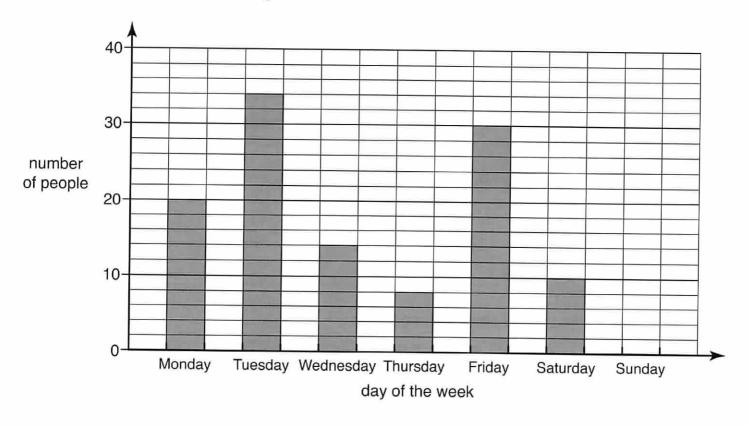

Five teams took part in the relay race at sports day. 6. Here are their results:

team name	time taken to finish, in seconds	position
Active Eight	51.2	
Cheetahs	48.34	1st
Speedy Sports	51.08	,
Twisters	59.9	5th
X-treme	50.8	211111

	X-treme	50.8			
(i) Complete	the table to show	their positions.			(2)
(ii) How muc	h faster was the te	am which came first tha	n the team whic	h came fifth?	
					5-7
		Answer:		S	(2)
	enter les les illes a	abaal report by 1.0 coos	ands		
The team Che	eetahs broke the s	chool record by 1.9 seco	mus.		
(iii) What wa	s the previous sch	ool record?			
		Answer:		S	(2
A or or Pinkal	d 4 wymnoro in th	oir toam			
	nad 4 runners in th				
(iv) Find the	mean time for eac	h runner in this team by	dividing their tot	al time by 4	

(iv) Find the mean time for each runner in this team by dividing their total time by 4

7. Robert asked all the children in his school on which day of the week they were born. Here is a bar chart showing his results:

(i) How many people does each small rectangle represent?

Answer: (**	Inswer:		(1)
-------------	---------	--	-----

There were 22 people born on Sunday.

(ii) Draw a bar on the chart to represent this.

(1)

(iii) Use the bar chart to complete the frequency table below.

day of the week	number of people
Monday	
Tuesday	
Wednesday	14
Thursday	
Friday	
Saturday	10
Sunday	22

(2)

#### (iv) Which day is the mode?

Answer:	(1)	ì
AUSWEL		6

8. Katherine has ten coins in a bag.

She has one 50-pence coin, two 20-pence coins, one 5-pence coin and the rest are 2-pence coins.

(i) What is the total value of all the coins in her bag?

(ii) What percentage of the coins are 20-pence coins?

(iii) One coin is picked at random from the purse.

On the scale below, mark

- (a) with **A** the probability that the coin is a 20-pence coin (1)
- (b) with **B** the probability that the coin is not a 20-pence coin (1)
- (c) with **C** the probability that the coin is worth less than £1 (1)

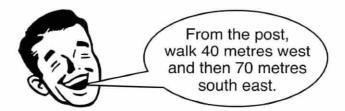

Here are the ingredients needed to make a tray of 20 flapjacks:	
200 grams of margarine 250 grams of oats 200 grams of sugar 100 grams of flour 3 tablespoons of syrup	
(i) Write out the ingredients you would need to make 10 flapjacks.	
grams of margarine	
grams of oats	
grams of sugar	
grams of flour	
tablespoons of syrup	(3)
Kelly needs to make 50 flapjacks for a party.  (ii) How much flour does she need?	
Answer:	(2)
Answer: grams	(2)

10. Alan climbs to the top of a mountain one day during his holiday. Below is a graph showing his height above sea level at different times during the day. 900

heig abo se leve n me	ve a el,	700 600 500 400 300 200 100		am	10	am	11 tin	am	12 n	oon	1 p	m	2 p	m

Adam's father has hidden Adam's birthday present in a field near their house.
 He has given him these instructions to help him find it.

Adam has decided to draw an accurate map to help.

- (i) Using a scale of 1 millimetre to represent 1 metre, draw accurately the route which Adam's father has described.
  - You will need to use a protractor.

(c) How far does this represent in the field?

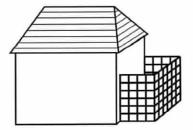

Answer: ..... m (1)

prime number square number cube number	(2)
(iv) Circle any of the words below which describe Chrissy's favourite number.	
Answer:	(1)
(iii) What is Chrissy's favourite number?	
Answer:	(3)
(ii) Find the mean of Bert's numbers.	
Chrissy looks at the numbers and tells him that her favourite number is equal to the mean of the numbers, minus 7	
He chooses 4 7 2 19 and 8	
Chrissy wants Bert to guess her favourite number.  She asks him to write down 5 numbers.	
	(2,
Answer:	(2)
(i) What was the number she thought of?	
She says that the result is 33	
Bert asks Chrissy to think of a number, double it and add 5	

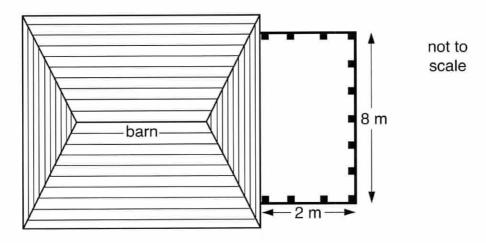

12. Bert and Chrissy are very good at maths and enjoy 'think of a number problems'.

13. Farmer Fred needs to build a rectangular sheep pen.

To save money, he decides to build it against his barn, so that he only needs to have fencing on three sides.

Here is the first plan:

(i) (a) What length of fence does he need to make this pen?

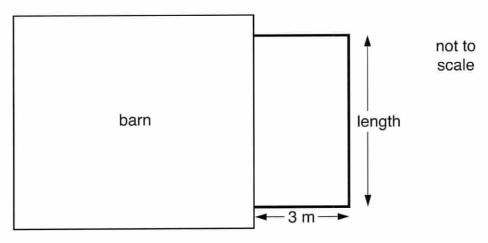

Answer:	 m	(1)	١
/ IIIOVVOI.	 20.0	1.1	1.

(b) What is the area of this pen?

Answer.		$m^2$	(1	١
Allowel.	***************************************		Α,	1

He decides to buy 15 metres of fence.

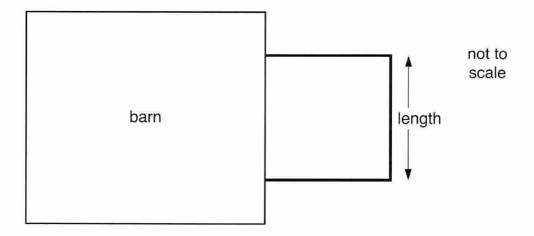

Here is his new plan:

(ii)	Find	the	length	of	his	new	pen
							•

Answer.	***************************************	m	(1	١
ALIGNACI.		111	1	1

Farmer Fred decides that he would like to build a square pen with his 15 metres of fence as shown below:

(iii) How long should each side be?

(iv) Given that 1 metre of fence costs £12, find how much it will cost Farmer Fred to buy 15 metres of fence.

#### 14. Look carefully at these number patterns:

	pattern A	pattern B
row 1	$1^2 - 0^2 \longrightarrow 1 - 0 \longrightarrow 1$	1 + 0 = 1
row 2	$2^2 - 1^2 \longrightarrow 4 - 1 \longrightarrow 3$	2 + 1 = 3
row 3	$3^2 - 2^2 \longrightarrow 9 - 4 \longrightarrow 5$	3 + 2 = 5
row 4	$4^2 - 3^2 \longrightarrow 16 - 9 \longrightarrow 7$	4 + 3 = 7

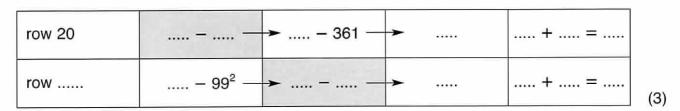

## (i) Complete rows 5 and 6 of this pattern:

row 5	5 <sup>2</sup> - 4 <sup>2</sup> —	<b>→</b> 25 − —	<b>→</b> 9	5 + =	
row 6	6 <sup>2</sup> – —	<b>→</b>	<b>&gt;</b>	+ =	(3)

### (ii) Complete row 10 of this pattern:

### (iii) Complete the non-shaded parts of these rows:

## (iv) What is the value of $1000^2 - 999^2$ ?

(Total marks: 100)
