Foundation Tier Paper 1
Mark scheme
June 2021
Version: 1.0 Final

Mark schemes are prepared by the Lead Assessment Writer and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation events which all associates participate in and is the scheme which was used by them in this examination. The standardisation process ensures that the mark scheme covers the students' responses to questions and that every associate understands and applies it in the same correct way. As preparation for standardisation each associate analyses a number of students' scripts. Alternative answers not already covered by the mark scheme are discussed and legislated for. If, after the standardisation process, associates encounter unusual answers which have not been raised they are required to refer these to the Lead Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of students' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this mark scheme are available from aqa.org.uk

## Glossary for Mark Schemes

GCSE examinations are marked in such a way as to award positive achievement wherever possible. Thus, for GCSE Statistics papers, marks are awarded under various categories.

If a student uses a method which is not explicitly covered by the mark scheme the same principles of marking should be applied. Credit should be given to any valid methods. Examiners should seek advice from their senior examiner if in any doubt.

M Method marks are awarded for a correct method which could lead to a correct answer.

A Accuracy marks are awarded when following on from a correct method. It is not necessary to always see the method. This can be implied.

B Marks awarded independent of method.
ft Follow through marks. Marks awarded for correct working following a mistake in an earlier step.

SC Special case. Marks awarded for a common misinterpretation which has some mathematical worth.

M dep A method mark dependent on a previous method mark being awarded.

B dep A mark that can only be awarded if a previous independent mark has been awarded.
oe $\quad$ Or equivalent. Accept answers that are equivalent. eg accept 0.5 as well as $\frac{1}{2}$
[a, b] Accept values between a and b inclusive.
[a, b) $\quad$ Accept values $\mathrm{a} \leq$ value $<\mathrm{b}$
3.14... Accept answers which begin 3.14 eg 3.14, 3.142, 3.1416

Use of brackets It is not necessary to see the bracketed work to award the marks.

Examiners should consistently apply the following principles

## Diagrams

Diagrams that have working on them should be treated like normal responses. If a diagram has been written on but the correct response is within the answer space, the work within the answer space should be marked. Working on diagrams that contradicts work within the answer space is not to be considered as choice but as working, and is not, therefore, penalised.

## Responses which appear to come from incorrect methods

Whenever there is doubt as to whether a student has used an incorrect method to obtain an answer, as a general principle, the benefit of doubt must be given to the student. In cases where there is no doubt that the answer has come from incorrect working then the student should be penalised.

## Questions which ask students to show working

Instructions on marking will be given but usually marks are not awarded to students who show no working.

## Questions which do not ask students to show working

As a general principle, a correct response is awarded full marks.

## Misread or miscopy

Students often copy values from a question incorrectly. If the examiner thinks that the student has made a genuine misread, then only the accuracy marks (A or B marks), up to a maximum of 2 marks are penalised. The method marks can still be awarded.

## Further work

Once the correct answer has been seen, further working may be ignored unless it goes on to contradict the correct answer.

## Choice

When a choice of answers and/or methods is given, mark each attempt. If both methods are valid then M marks can be awarded but any incorrect answer or method would result in marks being lost.

## Work not replaced

Erased or crossed out work that is still legible should be marked.

## Work replaced

Erased or crossed out work that has been replaced is not awarded marks.

## Premature approximation

Rounding off too early can lead to inaccuracy in the final answer. This should be penalised by 1 mark unless instructed otherwise.

## Continental notation

Accept a comma used instead of a decimal point (for example, in measurements or currency), provided that it is clear to the examiner that the student intended it to be a decimal point.

| Q | Answer | Marks | Comments |
| :---: | :---: | :---: | :---: |
| $\mathbf{1}$ | $60 \%$ | B1 |  |

| $\mathbf{Q}$ | Answer | Marks | Comments |
| :---: | :---: | :---: | :---: |
| $\mathbf{2}$ | The colour of the horse | B1 |  |

| Q | Answer | Marks | Comments |
| :---: | :---: | :---: | :---: |
| $\mathbf{3}$ | -0.86 |  | B1 |

| Q | Answer | Marks | Comments |
| :---: | :---: | :---: | :---: |
| $\mathbf{4}$ | 0.8 | B1 |  |

| Q | Answer | Marks | Comments |  |
| :---: | :---: | :---: | :---: | :---: |
| 5(b)(i) | 0 | B1 | oe value as a decimal, fraction or percentage |  |
|  | Additional Guidance |  |  |  |
|  | $\frac{0}{40}$ |  |  | B1 |
|  | zero |  |  | B1 |
|  | nothing, none, no, imp |  |  | B0 |
|  | 0 out of 40, 0 in 40, 0 |  |  | B0 |
|  | ignore non-contradict <br> eg 0\%, impossible <br> eg 0, unlikely | rrect an |  | $\begin{aligned} & \text { B1 } \\ & \text { B0 } \end{aligned}$ |

| Q | Answer | Marks | Comments |  |
| :---: | :---: | :---: | :---: | :---: |
| 5(b)(ii) | $\frac{18}{40}$ or 0.45 or $45 \%$ | B2 | oe <br> B1 <br> 18 as a numerator of a valid probability <br> or <br> 40 as a denominator of a valid probability |  |
|  | Additional Guidance |  |  |  |
|  | 18:40 or $9: 20$ |  |  | B1 |
|  | Ignore any attempt to simplify or convert a correct answer |  |  |  |

| Q | Answer | Marks | Comments |
| :---: | :---: | :---: | :---: |
| 5 (b)(iii) | $\frac{11}{40}$ or 0.275 or $27.5 \%$ | B1 | oe |

| Q | Answer | Marks | Comments |
| :---: | :---: | :---: | :--- |
| $\mathbf{6}$ (a) | $(3-1) \times 4$ | M1 | oe <br> eg $12-4$ |
|  | 8 | A1 |  |

| Q | Answer | Marks | Comments |
| :---: | :---: | :---: | :---: |
| 6(b) | 2 and a half symbols, similar size and vertically aligned | B2 | B1 <br> symbols to represent between 8 and 12 exclusive <br> or <br> 2 and a half symbols but badly aligned or sized |
|  | Additional Guidance |  |  |
|  | Mark intention |  |  |

| Q | Answer | Marks | Comments |
| :---: | :---: | :---: | :---: |
| 6(c)(i) | Alternative method 1 - using actual values |  |  |
|  | $4+4+4+4+3$ or 19 | M1 | oe |
|  | $4+12+$ their $19+10$ or 45 | M1dep | oe |
|  | $\frac{19}{45}$ | A1 | oe fraction, decimal or percentage accept 0.42 or better accept 42\% or better |
|  | Alternative method 2 - using number of symbols |  |  |
|  | $4+0.75$ or 4.75 | M1 | oe |
|  | $1+3+$ their $4.75+2.5$ or 11.25 | M1dep | oe |
|  | $\frac{19}{45}$ | A1 | oe fraction, decimal or percentage accept 0.42 or better accept $42 \%$ or better |

| Q | Answer | Marks | Comments |
| :---: | :---: | :---: | :---: |
| 7(a)(i) | 480 | B1 |  |

| Q | Answer | Marks | Comments |  |
| :---: | :--- | :---: | :---: | :---: |
| 7(a)(ii) | Value recorded in minutes (not <br> hours) | B1 | oe |  |
|  | 8 | B1 |  |  |
|  | Additional Guidance |  |  |  |
|  | Didn't put the decimal point in <br> $4.8(0)$ | First B1 <br> Second B1 |  |  |

| Q | Answer | Marks | Comments |  |
| :---: | :--- | :---: | :---: | :---: |
| 7(b)(i) | Data that has not been sorted | B1 | oe |  |
|  | Additional Guidance |  |  | B1 |
|  | Data that has not yet been organised | B1 |  |  |
|  | Date that has not yet been processed |  |  |  |

| Q | Answer | Marks |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 7(b)(iii) | ... worthwhile analysis can take place <br> ... appropriate findings/conclusions can take place <br> ... data is no longer contaminated by extreme values <br> ... data is more reliable | B1 | oe |  |
|  | Additional Guidance |  |  |  |
|  | ... extreme values are removed so they are no longer in the data <br> ... extreme values are removed |  |  | $\begin{aligned} & \text { B1 } \\ & \text { B0 } \end{aligned}$ |

| Q | Answer | Marks | Comments |  |
| :---: | :---: | :---: | :---: | :---: |
| 8(b) | Indicates on the ordered diagram that the median is the 11th value | B1 |  |  |
|  | Additional Guidance |  |  |  |
|  | Accept any clear indication <br> eg crossing off 10 numbers either side of 20 |  |  | B1 |
|  | Numbers ordered in the working space and 20 indicated |  |  | B1 |
|  | It's the $11^{\text {th }}(=20)$ |  |  | B0 |

| Q | Answer | Marks | Comments |
| :---: | :--- | :---: | :--- |
| 8 | All the values are more than 20 | B1 | oe <br> Do not accept an answer achieved <br> through calculation |
|  | Additional Guidance |  |  |
|  | The values at the weekend are more than 20 | B1 |  |
|  | The values are more than 20 |  |  |

| Q | Answer | Marks | Comments |
| :---: | :--- | :---: | :--- |
| 8(d) | Clear intention to add all 15 <br> weekday values <br> or <br> 285 | M1 | eg 14 $+16+12+\ldots$ <br> allow one error or omission |
|  | $(285 \div 15=) 19$ | A1 | oe |
|  | Box for 'true' ticked <br> and <br> 19 | A1ft | oe <br> ft their 285 $\div 15$ |

| Q | Answer | Marks | Comments |  |
| :---: | :--- | :---: | :--- | :--- |
| $\mathbf{9}$ (b)(i) | 5 points plotted correctly | B2 | B1 3 or 4 points plotted correctly |  |
|  | Additional Guidance |  |  |  |
|  | Tolerance is half a small square |  |  |  |

| Q | Answer | Marks | Comments |  |
| :---: | :--- | :---: | :---: | :---: |
| 9(b)(ii)She is wrong, there is no <br> correlation (between the two <br> variables) | B1 | oe |  |  |
|  | Additional Guidance |  |  |  |

| Q | Answer | Marks | Comments |
| :---: | :---: | :---: | :---: |
| $\mathbf{1 0 ( a )}$ | Cannot tell | B 1 |  |

| Q | Answer | Marks | Comments |
| :---: | :--- | :---: | :--- | :--- |
| $\mathbf{1 0 ( c )}$ | Bars drawn to correct widths <br> and <br> Bars drawn to correct heights | B2 | B1 <br> Bars drawn to correct widths <br> or <br> Bars drawn to correct heights |
|  | Additional Guidance |  |  |
|  | Bars should be intended straight, tolerance is half a small square |  |  |

| Q | Answer | Marks | Comments |  |
| :---: | :---: | :---: | :---: | :---: |
| 10(d) | Correct comment about the average/modal group <br> eg gaming Vlogs are longer on average | B1 | oe |  |
|  | Correct comment about the range or the possible maximum <br> eg gaming Vlogs have more varied lengths <br> eg gaming Vlogs were up to 80 minutes long whereas fashion Vlogs were up to 60 minutes long | B1 | oe |  |
|  | Additional Guidance |  |  |  |
|  | Mode is bigger for gaming Vlogs <br> Mode is bigger for gaming Vlogs, so the average is longer |  |  | First B0 <br> First B1 |
|  | Range is bigger for gaming Vlogs <br> Range is bigger for gaming Vlogs, so the lengths of the gaming Vlogs are more spread out |  |  | Second B0 Second B1 |

| Q | Answer | Marks | Comments |
| :---: | :--- | :---: | :--- |
| $\mathbf{1 1}$ | Allocate each of her friends a <br> (different) number between 1 and 6 | B2 | oe <br> B1 |
|  |  |  |  |
|  | (Roll the dice and) match the <br> number rolled with the friend with <br> that number | B1 | oe |

| Q | Answer | Marks | Comments |
| :---: | :---: | :---: | :---: |
| 12(a) | 124 | B1 |  |

| Q | Answer | Marks | Comments |
| :---: | :--- | :---: | :---: |
| 12(b) | 140 or 136 | M1 |  |
|  | 4 | A1 |  |

| Q | Answer | Marks | Comments |
| :---: | :--- | :---: | :--- |
| $\mathbf{1 2 ( c )}$ | $2<t \leq 4$ chosen for modal class | B1 |  |
|  | Sight of one correct frequency <br> other than 30 for $0<t \leq 2$ | M1 | oe |
|  | There are more calls in the <br> $2<t \leq 4$ group than in any other <br> group <br> or <br> Correct frequencies $30,50,12,24$, <br> $8,12,4$ | A1 | oe |

| Q | Answer | Marks | Comments |  |
| :---: | :---: | :---: | :---: | :---: |
| 12(d) | Three of these errors clearly identified: <br> missing vertical label <br> horizontal scale error (two 8s or 6 is missing) <br> should not be bars (or should be a curve/line) <br> points should be plotted at the upper bounds incorrect use of scale break incorrect first (bar) height | B3 | oe <br> B2 2 <br> B1 | identified identified |
|  | Additional Guidance |  |  |  |
|  | She's drawn a histogram (implies should not be bars) |  |  | B1 |
|  | No title |  |  | B0 |

| Q | Answer | Marks | Comments |
| :---: | :--- | :---: | :---: |
| 13(a) | Curry sauce | B1 |  |

| Q | Answer | Marks | Comments |  |
| :---: | :---: | :---: | :---: | :---: |
| 14(a) | Any reasonable hypothesis relating Year 7, Year 11 and homework <br> eg <br> Year 11 receive more homework than Year 7 | B1 | oe |  |
|  | Additional Guidance |  |  |  |
|  | Allow older (students) to imply Year 11, younger (students) to imply Year 7 |  |  |  |
|  | Y11 students get more homework (than Y7 students) |  |  | B1 |
|  | Older students get more homework (than younger students) |  |  | B1 |
|  | 16-year-olds have more homework (than 11-year-olds) |  |  | B1 |
|  | Year 11 spend more time on their homework than Year 7 |  |  | B1 |
|  | Year 11 homework takes longer (on average) than Year 7 homework |  |  | B0 |

| Q | Answer | Marks |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 14(b) | All Year 11 and All Year 7 students (in Tom's school) | B1 | oe |  |
|  | Additional Guidance |  |  |  |
|  | All Year 11 and Year 7 (students) |  |  | B1 |
|  | The Year 11 and Year 7 students |  |  | B1 |
|  | The Year 11s and Year 7s |  |  | B1 |
|  | Year 11 and Year 7 students |  |  | B0 |
|  | (All) students (at Tom's school) |  |  | B0 |

| Q | Answer | Marks | Comments |  |
| :---: | :---: | :---: | :---: | :---: |
| 14(c) | Method A named correctly as random (sampling) <br> and any advantage or disadvantage given about Method A <br> eg <br> In A every student has an equal chance of being selected (which is not true of $B$ and/or $C$ ) | B2 | B1 <br> Method A named correctly as random (sampling) or any advantage or disadvantage given about Method A |  |
|  | Method B named correctly as convenience/opportunity (sampling) <br> and <br> any advantage or disadvantage given about Method B <br> eg <br> In B this excludes any students who do not go to the dinner hall | B2 | B1 <br> Method B named correctly as convenience/opportunity (sampling) or any advantage or disadvantage given about Method B |  |
|  | Method C named correctly as quota (sampling) <br> and <br> any advantage or disadvantage given about Method C <br> eg <br> In C we do not know the selection method to be used | B2 | B1 <br> Method C named correctly as quota (sampling) <br> or any advantage or disadvantage given about Method B |  |
|  | Method chosen with a correct advantage given <br> and <br> a correct advantage or a correct disadvantage given for the other two methods | B1 |  |  |
|  | Additional Guidance |  |  |  |
|  | Do not award the final B1 with an incorrect (or contradictory) advantage or disadvantage seen for any of the three methods |  |  |  |
|  | 'At random' does not imply the name of Method A |  |  |  |
|  | 'Avoids bias' is an advantage for Method A |  |  |  |
|  | Time can be an advantage for Method B, a disadvantage for Method A, a disadvantage for Method C |  |  |  |

| Q | Answer | Marks |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 14(d) | Any two valid problems, eg <br> There is no time frame given <br> 'How much' is unclear hours/pieces/nights <br> There are no options given (so answers might be hard to collate) | B2 | oe <br> B1 any one |  |
|  | Additional Guidance |  |  |  |
|  | It is an open question meaning data is harder to process |  |  | B0 |
|  | Reference to some people not getting any homework |  |  | B0 |
|  | There isn't a place to answer the question (implies no response section) |  |  | B1 |

| Q | Answer | Marks |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 14(e) | On average, Year 11 have (3 hours) more homework (than Year 7) <br> or <br> On average, Year 7 have (3 hours) less homework (than Year 11) | B1 | oe b simil |  |
|  | Additional Guidance |  |  |  |
|  | Condone spend/spent for received/receive |  |  |  |
|  | Year 11 have more homework than Year 7 |  |  | B0 |

| Q | Answer | Marks | Comments |
| :---: | :--- | :---: | :--- |
| $\mathbf{1 4 ( f )}$ | Students at Tom's school have <br> more homework (on average) than <br> students at other UK schools | B1 | oe |
|  | Students at Tom's school have <br> less homework (on average) than <br> students in Shanghai (- China) <br> (schools) | B1 | oe <br> Any correct comparison of Tom's <br> data with one of the other countries |
|  | Additional Guidance |  |  |

| Q | Answer | Marks |  |  |
| :---: | :---: | :---: | :---: | :---: |
| 14(g) | The secondary data is for 15 -yearolds whereas Tom's data is for Year 11 (who are 15 and 16-yearolds) <br> or <br> The chart could be from several years ago | B1 | oe |  |
|  | Additional Guidance |  |  |  |
|  | The data from the Internet had no sour |  |  | B0 |

| Q | Answer | Marks | Comments |  |
| :---: | :--- | :--- | :--- | :--- |
|  | Tom's as the internet chart had no <br> source (so we have no idea <br> where the data has come from) <br> or <br> The internet data as we don't <br> know how Tom eventually <br> collected his data <br> or <br> 14(h) | B1 | oe |  |
| The internet data as it is likely to <br> have been collected from more <br> than one school in those countries <br> (whereas Tom's is just from one <br> school) | Additional Guidance |  |  |  |
|  | The internet data as it has been collected from more than one school <br> in those countries (this is not known for sure) | B0 |  |  |
